

# Instructional Strategies in Career and Technical Education(CTE)

**COMPONENT #: 2-211-001**

**POINTS TO BE EARNED: 120 MPP**

## **PART I – PLANNING**

**DESCRIPTION:** Write a brief description of content and intent of component.

This component is designed to enable the participant to identify, research, and implement current instructional strategies, innovative teaching techniques, technological utilization/integration, and/or new instructional materials that can be used to improve the instructional process and professional growth in the field of Career and Technology Education.

Upon successful completion of this professional development activity, the participant will be able to incorporate into his/her instruction the principles presented in this workshop.

**STANDARDS/FOCUS AREAS ADDRESSED BY COMPONENT:** Identify the standards, national/state/district imperatives, initiatives or key focus areas this component supports.

**Standards for Professional Learning** (choose one)

- |   |  |

| <input checked="" type="checkbox"/> PS 4 – Instructional Delivery and Engagement | <input type="checkbox"/> PS 8 – Learning Environment |
| <input type="checkbox"/> PS 5 – Assessment                                       |  |

**IMPACT FOCUS AREA(S):** select the intended impact focus area(s) from the choices below. Note that Impact Evaluation procedures should reflect this level of impact.

# Instructional Strategies in Career and Technical Education (CTE)

## COMPONENT #: 2-211-001

- Educator knowledge/skill (content)                      X Student learning  
X Educator (professional growth)                       Organizational support and change

**SPECIFIC LEARNER OUTCOMES:** Identify the intended learner outcomes (number and content of learner outcomes should be reflective of the total points participants will earn as a result of completing this learning).

1. Identify and describe innovative strategies, techniques, and/or materials appropriate for implementation or utilization in a specific Career and Technology Education instructional assignment.
2. Identify innovative techniques, strategies, and/or instructional materials, and describe in writing how each can be used to support the performance standards in the Career and Technology Education curriculum standards, including the Technological Literacy Standards.
3. Identify current research issues and developments in the field of instruction in the area of Career and Technical Education (CTE) programs.
4. Identify practical applications of the research in the classroom including strategies that promote creative and higher order critical thinking capabilities of students.
5. Develop skills in analyzing and assessing CTE instructional materials.
6. Develop activities that integrate Science, Technology, Engineering and Mathematics (STEM) principles and concepts into the curriculum.
7. Develop activities that address the issues surrounding the diverse needs of learners.
8. Research and analyze alternative delivery systems such as distance learning and the use of interactive technology.
9. Examine equitable methods, techniques, and practices addressing the needs of all students in the Career and Technology Education laboratory setting.
10. Research, analyze, and implement the principles of continual quality improvement of instruction for professional growth.

### **PART II – LEARNING**

**LEARNING PROCEDURES:** Describe the experiences (the “what”) and formats/methods (the “how”) that will be used to provide participants with the knowledge and skills sufficient to master the intended learner outcome of this component.

1. Participants will have a variety of experiences that will include, but are not limited to, the following professional learning models which are through a blended/hybrid format that will include:
  - o Web based resources
  - o Live online course sessions
  - o Hands-on applied learning activities
  - o Case Studies
  - o Collaborative learning activities
  - o Review of current research and best practices
2. Participate actively in discussions and activities on innovative strategies/techniques, technology integration, and/or materials for specific instructional objectives in the various Career and Technical Education areas (SLO 1-10).
3. Discuss how the innovative strategies, techniques, technology integration, and/or materials can be used to support specific instructional objectives (SLO 1-10).

# Instructional Strategies in Career and Technical Education (CTE)

## COMPONENT #: 2-211-001

4. Implement specific instructional strategies and activities that will address the needs of diverse learners (SLO 2, 4 & 8).
5. Ensure support and share successful strategies with colleagues (SLO 1-10).
6. Monitor and adjust instruction of Career and Technical Education programs, as needed, as a result of the implementation feedback and findings.

### PART III – IMPLEMENTATION

**IMPLEMENTATION PROCEDURES:** Method(s) and resource(s) that will be provided to support implementation of new learning for participants (check all that apply).

- X Apply newly acquired professional knowledge, skills, dispositions, and behaviors to improve practice.
- X Provide sufficient classroom- and school-focused support and assistance by skillful coaches, mentors, or others to the educator to ensure high-fidelity implementation of professional learning.
- X Provide educators with web-based resources and assistance to support implementation of professional learning.

### PART IV – EVALUATION

**IMPACT EVALUATION PROCEDURES:** Describe the processes that will be used to determine the impact (as identified in previous section titled “Impact Focus Areas”). Description should reflect methods for determining at least ONE of those areas, and will include a specific section for each impact focus area identified for this component.

1. Educator Knowledge/skill: Will consist of observation of participants using the identified skills, techniques, methods, specified in the component objectives during the learning events; will also include reflective journal entries of participants after receiving feedback from their peers.
2. Student Learning: Will include evidence of implementation through documented impact on student achievement.

**COMPONENT EVALUATION PROCEDURES:** Describe the process(es) that will be used to determine the effectiveness of this component to include design, implementation and impact (check all that apply).

- X Evaluate the impact of all professional learning on educator’s practice through reflection, assessment, collaborative protocols for examining educator practice and work samples, peer visits, and/or professional portfolios.
- X Determine the degree to which educator’s professional learning contributed to student performance gains as measured by classroom assessment data.
- X Use summative and formative data from state or national standardized student achievement measures, when available, or other measures of student learning and behavior such as district achievement tests, progress monitoring, educator-constructed tests, action research results, discipline referrals, and/or portfolios of student work to assess the impact of
